

Meaning + Truth

Meaning is relative to a system of expression - language -
necessity of context, of familiarity w a language, of
a social milieu, of a historical period

Understanding (desire) is relative: it is a view-point,
and until total vision (comprehensive coherent view of all)
is reached, that view-point is limited, incomplete,
imperfect

Truth 1° comprehensive coherent view of all things is true adequately

2° ~~statements~~ (including
~~with all propositions and their contradictions~~)
are more or less incomplete and sometimes
fragments of truth

2° There are many propositions but neither intend
nor claim to express truth as 1°
