

Criticata

Es quae dyptosis una actata epusitiva

At equis intellectualis comprehendit positivam quia a sensitive comprehendit
epusita hata comprehendit victoris quia comprehendatur

Desmond

Coyle

same moving body; for on different views of what is "at the
same time," different positions will be assigned the two ends
"at the same time"; it may be objected that there is no necessity
of assigning positions for the two ends to measure the distance
between them, that it is enough to lay a measuring rod alongside
the measured body; the answer is that, for all frames of reference
in which direct measurement is physically possible, "at the
same time" will have the same meaning
